PROFILE

Full-Stack Developer with over 4 years of experience in designing, developing, and maintaining web and business applications. Specialized in building scalable, reliable, and business-oriented solutions. Known for strong ownership, adaptability, and the ability to deliver end-to-end projects.

TECHNICAL SKILLS

- **Backend:** Java (8/11/17), Spring Boot, JPA/Hibernate, Spring Security/JWT, Express.js (Node.js), Oracle ADF
- **Frontend:** Angular (13/16), React, Next.js, Nuxt.js, Ionic (mobile)
- **Databases:** MySQL, SQL Server, Oracle, MongoDB, SQLite
- **DevOps:** Docker, Docker Compose, Jenkins, GitLab CI/CD, AWS, Nginx, Apache, Tomcat, JBoss, Linux
- **Messaging:** Apache Kafka, RabbitMQ, Event-Driven Architecture
- **Testing:** JUnit 5, Selenium, TDD, BDD (Cucumber), Integration Testing
- **Versioning:** Git, GitHub, GitLab
- **Tools:** IntelliJ, VS Code, Postman, Jira, YouTrack, Slack, Docker, Jenkins
- **Methods:** Agile, Scrum, UML, Code Review

EDUCATION

BACHELOR'S DEGREE IN COMPUTER SCIENCE – SYSTEMS AND SOFTWARE	2019
Higher Institute of Computer Science of Mahdia	
Baccalaureate in Computer Science	2016
M'hamdia High School	

PROFESSIONAL EXPERIENCE

Software Developer – BeOnline	May 2024 – Present
• Built web and e-commerce platforms using Spring Boot and Angular 16 • Built and secured REST APIs with Spring Security and JWT, serving multiple frontend clients • Integrated payment gateways (Stripe, PayPal, Konnect) into production platforms • Applied TDD practices with JUnit 5, writing unit and integration tests before implementation • Automated build, test and deployment pipelines using Jenkins and Docker • Designed event-driven architecture using Apache Kafka between microservices • Managed containerized environments with Docker Compose across dev, staging, and production • Monitored application health and logs using AWS CloudWatch and Nginx reverse proxy configuration • Stack: Java, Spring Boot, Angular 16, Docker, Jenkins, Kafka, MySQL, SQL Server	

Software Developer – ELITINFO Tunisie

October 2023 – May 2024

- Contributed to an ERP platform for banking and insurance sectors serving enterprise clients
- Developed backend services and REST APIs for accounting, cash, purchasing, and workflow modules
- Designed microservice architecture with asynchronous messaging using RabbitMQ for workflow notifications
- Secured APIs with Spring Security, JWT, and role-based access control (RBAC)
- Optimized complex SQL queries and improved overall application performance
- Practiced CI/CD deployment using Docker and GitLab CI pipelines with automated testing stages
- Used Docker Compose to manage multi-container environments for dev and staging
- Collaborated within an Agile/Scrum team with sprint planning and code reviews
- **Stack:** Java, Spring Boot, Angular 16, Docker, GitLab CI, RabbitMQ, SQL Server

Software Developer – Agence Web P24

April 2022 – October 2023

- Built Uniform, a full training management platform (web and mobile) from scratch
- Developed a web and mobile TMS with real-time GPS tracking using Ionic and Angular
- Automated cloud deployments via GitLab CI/CD pipelines with Docker for zero-downtime releases
- Configured Nginx as reverse proxy for production web applications
- Used Docker Compose to orchestrate backend, frontend, and database containers
- **Stack:** Java, Spring Boot, Angular 13, Ionic, Docker, GitLab CI, Nginx

Software Developer – Youlead

September 2021 – March 2022

- Delivered custom web applications and responsive showcase websites for business clients
- Integrated CMS solutions (Octopus) for autonomous content management
- **Stack:** Java, Spring Boot, Octopus CMS

Software Developer – SIGA

August 2019 – August 2021

- Developed and optimized ERP modules for enterprise clients
- Improved UI performance and user experience across core business modules
- **Stack:** Oracle ADF, JSF, JSP, Oracle 11g
